## Biography

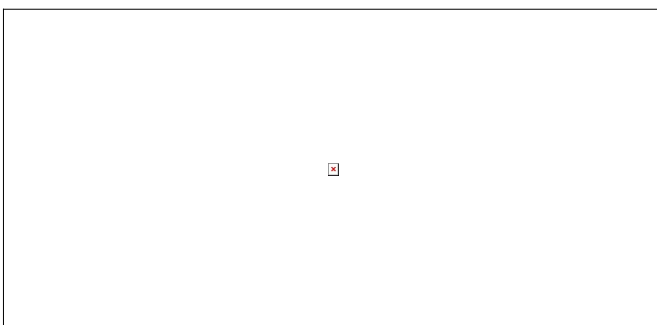

Jim Rogers is a globally recognised investor and financial commentator, best known as the co-founder of the Quantum Fund alongside George Soros. His experience in global macro investing and international markets has made him a sought-after voice for organisations seeking perspective on economic cycles, commodities and cross-border opportunity.

After beginning his career on Wall Street with Dominick & Dominick and later Arnhold and S. Bleichroder, Rogers helped establish the Quantum Fund as a global macro investment partnership. He later stepped back from fund management to focus on private investment and long-term market analysis.

He is chairman of Beeland Interests, Inc. and is associated with the development of the Rogers International Commodities Index (RICI), providing a structured benchmark for commodities markets. His work reflects a sustained focus on global economic trends, resource markets and international capital flows.

Rogers is also the author of *Investment Biker* and *Adventure Capitalist*, drawing on extensive overland journeys across multiple continents and countries. These record-recognised global expeditions inform his first-hand observations of economic development, political systems and emerging markets, adding a distinctive international dimension to his market insights.
