Founder at Unlimited Futures, International Ambassador, Speaker and Presenter

Fellow of the Royal Geographical Society, Sarah Begum is an Impact Entrepreneur and Wonder Woman. Sarah has been exploring the world, studying tribes and different ways of life whilst investigating current affairs and making a humanitarian effort to help people along the way through her work.

### Sarah Begum's 2026 Biography

#### Meet Sarah Begum

Sarah Begum: Super Woman, is an epic entrepreneur, legendary Queen of the omniverse and adviser to world leaders, royal families, governments, the military and intelligence agencies from the United Kingdom, USA (CIA), UAE (SIA), Australia, secret organisations, Ministry of Defence, Hollywood Actors and Directors, the media and elite individuals around the world including families that have been ruling the nations they are from by transforming their mindset with her alchemy and unique superpowers. Exploring the world on missions with purpose to change lives and the Planet Earth forever in ways that are inconceivable by others and what we all need, she has been chosen to create the beautiful and golden future she envisioned for us all to thrive in.

Her first film, 'Amazon Souls', where she immersed in the lives of the Huaorani tribe and was made a real-life Amazon Warrior Queen to spread their message about protecting their land, premiered at the Cannes Film Festival then was distributed worldwide. Later, she was chosen to be an advocate for the tribe to propose a bilateral agreement to the Ecuadorian government to create peace and unity so that they could protect their resources while allowing trade to continue in an ethical manner.

Recently, she has initiated Earth Shield alongside Elon Musk, a global endeavour to protect the Planet Earth from global warming to align with what the world needs for a cooler, safer environment while preparing to become an interplanetary species publicly. Her efforts include creating world peace and unity by leading with love, empathy and understanding so that all nations align on the mission for the grandeur project before the Earth Shield commences and fundraising for a total of \$500 Billion is in progress to make it happen.

The Water Project is another world changing project that Xandria is working on with Bill Gates and the Gates Foundation to clean the water on

Planet Earth and enhance it with high frequency supplements that allow us to be nourished in innovative ways that are good for all life on Earth. There is another project waiting to be announced that allows humanity to become superhuman so that we all become the best versions of ourselves.

The Guardian's San Miguel Rich List named her as one of the world's top Trailblazers, an enriching explorer who has been making an impact by helping people. She is endorsed by Bear Grylls, David Attenborough, Jane Goodall, Hollywood Actors Cyk Cozart and Kevin Hart as well as others for her positive contributions to the world.

## What Sarah Begum's clients say

Sarah came and spoke to the Pegasus Network about her work and experiences. She gave a wonderful talk, remarkably full of insight into the different people she has met on her adventures. Her boundless enthusiasm shone through as she spoke about her motivation and concerns. It was particularly fascinating to hear of her experience living with the Huaorani in Ecuador which launched her career. We look forward to hearing more from Sarah in years to come.

Sarah came to the school to deliver an assembly based on her experiences journeying through the Amazon. Being an all-girls school the students could really connect to Sarah, and were inspired by the fact that someone they could relate to so closely could undertake such fantastic adventures. Your presentation really did engage with them and we all at Highbury Fields School wish you best for your future adventures!

Sarah spoke about her Amazon Souls film at the Adventure Travel Film Festival and kept the audience entertained and enthralled with her stories.

**Lois Pryce**

*Adventure Travel Film Festival*

Sarah came to visit our sixth form in October to talk about and screen her Amazon documentary. The film completely surpassed my already high expectations - absorbing, heartfelt and humorous. A class act of documentary film-making. Sarah has engaging, warm and perhaps above all as interested in her audience as she was interesting. The time she spent with a group of students at lunch after the lecture - the most popular lunch of the lecture series' in the last 2 years - and the effort she made to question and advise each of them is a testament to her passion for people. I think she left all the girls better informed and more inspired than before her lecture.

Sarah it was a wonderful honour having you at our Nari Diganta International Women's day event on 8 March 2015 as a speaker and participant on our panel of successful British Bengali women. The team at Nari diganta and audience most appreciated your work in that it brought home to women your ability to break free of stereotypical, sexual, cultural, religious bigotry to explore adventurously and achieve success as a woman. We would be pleased to have your presence again in order to empower and encourage women to do the same.
