

Paolo Surico

Professor of economics at London Business School

Dr Paolo Surico is Professor of Economics at London Business School, fellow of the Centre for Economic Policy Research, research associate at the London School of Economics Centre for Macroeconomics and research consultant to several international policy institutions and central banks, such as the Bank of England, the IMF and the European Central Bank.

Paolo's biography

Paolo Surico's background

Before joining London Business School in 2009, he was Advisor of the Monetary Policy Committee of the Bank of England.

Paolo's work has been featured in many leading international journals as well as international press (e.g. The Economist and Financial Times) and Italian media (i.e. Sole 24 ore and Corriere della Sera). Paolo has won numerous awards in recognition of his research achievements and several teaching prizes in recognition of his presentation skills and engaging delivery style. Outside London Business School, Paolo has participated as Keynote Speaker at high profile events hosted by financial and nonfinancial companies for their client or senior executives, including INEOS, UBS, PwC, Citywire, Rugby Football Union, Dartmouth Partners, Prudential, etc.

Paolo Surico's expertise lays at the intersection of macroeconomics and finance with particular emphasis on monetary and fiscal policy, housing and mortgage markets, macroeconomic outlook and forecasts on the performance of advanced economies and [emerging markets](#). His latest lectures and research have focused on the Economics of a Pandemic: the case of Covid-19, World Trends, Brexit, Globalization and Income Inequality, [climate change](#), secular stagnation, the rise of populism, the macroeconomic impact of demographic changes, automation and artificial intelligence, monetary policy, house prices and the credit market, public debt sustainability, household and corporate debt, global imbalances and emerging markets.

Paolo's talks

- **Household and Corporate Debt**

- **The Economics of a Pandemic: the case of Covid-19**

What is the best policy response to a health crisis? And to an economic pandemic? For how long can the contagion curve be kept flat without collapsing the world economy? what are the essential public health and macroeconomic trade-offs that governments need to focus on?

In this session, Paolo will discuss the major economic and policy challenges posed by the worst health and economic crises of our time, looking at how Covid-19 will completely reshape the world economy, and how governments and central banks around the world can still avoid an economic catastrophe by breaking the last economic taboo.

- **Public Debt Sustainability**

- **Globalization and Income Inequality**

- **Global Imbalances and Emerging Markets**

- **The Macroeconomic Impact of Demographic Changes**
